# Mobile Attendance Tracking

Empower employees with real time insight and easy access to business activities on the go with Easy Clocking Mobile

✓ Review & approve time card

✓ Clock in / out with GPS geofence

✓ View schedules in real time

✓ Request paid time off

✓ Track job costing

✓ Instantly see all employee data

Supervisor group punch

Empower supervisors with the ability to clock in employees on the go. Set policies to restrict by geo location, which employees, department, or location a supervisor has access to.

Track job costing

Employees can select their assigned job codes, and clock in on their own mobile device.

Realtime access from anywhere

✓ 100% browser based interface

✓ Instant real time information

✓ Access anytime, anywhere

✓ Compatible with Chrome, Internet Explorer, Firefox, & Safari browsers

We've made it simple in 4 easy steps

 # 4 PROCESS PAYROLL

 # 1 COLLECT DATA

 # 3 MANAGE DATA

 # 2 TRANSFER DATA

Export data seamlessly into all payroll & HR softwares. Including Quickbooks, ADP, Paychex & Sage.

The first and most critical step is the ability to collect time data fast & accurately. Choose from our wide array of fingerprint, smart card, pin entry, PC or mobile employee time clocks.
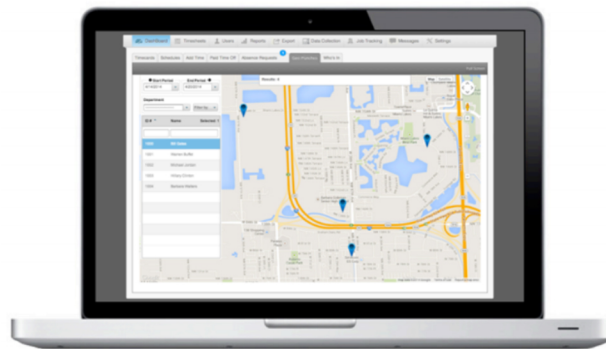

Our powerful & easy to use interface gives you instant real time insight to effectively manage your company's time attendance data virtually anywhere.

Once Time records are collected they are transferred automatically from the time clocks to the software in real time as it happens.

Mobile Time Attendance with Geographical location

Timecard approval on the go

Give employees the ability to review and approve their timecards anytime, anywhere.

Bird's eye view

View a map of everyone who is clocked in at all your locations to better manage your projects and employees.

Employee Scheduling

Eliminate schedule-related attendance excuses. Employee has 24/7 access to schedules and shift changes in real time.

Clocking with GPS Restriction

Restrict where employees can and cannot clock in and out from. By setting a geographical perimeter, employees are only allowed to clock in or out from the specified GPS location.
